ABOUT ME

Dynamic Software Developer Intern at JobTarget with expertise in performance optimization and debugging. Proven ability to enhance software efficiency and foster collaboration in Agile environments. Strong problem-solving skills complemented by technical proficiency in Python and front-end frameworks, driving successful project outcomes and improving team productivity.

Experienced with programming languages such as Java and Python, contributing to the development of scalable software solutions. Utilizes coding best practices and debugging techniques to ensure efficient project completion. Strong understanding of collaborative teamwork and effective communication skills to drive project success.
